

PFAS Compliance

Per- and polyfluoroalkyl substances (PFAS) according to standard Directive 2020/2184/EU are a group of chemicals used in the manufacture of many products. There is currently an initiative by a group of countries under the EU REACH, which aims to restrict the group of PFAS substances.

We are committed to fulfilling our environmental responsibilities and are aware of our commitment to address the health concerns and impacts of PFASs. We are actively monitoring this development and are in contact with our suppliers with the aim of finding out at an early stage whether any of our products in our would be affected by a possible future restriction on PFASs. would. From the side of the European Commission, a decision on this proposal is expected for 2025.

We trust this information meets your expectations. Should you have additional questions please don't hesitate to contact us.
