3. Offered Services

Drive Technology

We develop, manufacture and sell innovative products for the drive technology – ball screws with cold rolled threads – focus on the needs of potential OEM applications.

- Carry ball screws
- Speedy High-helix lead screws
- Rondo Round-thread lead screws
- Easy Light lead screws

The manufacturing competence of Eichenberger Gewinde AG is thread rolling. Thread profiles from Eichenberger thread screws are made only with this manufacturing process. Although all Eichenberger screw drives are manufactured using the rational thread rolling process, the individual product series have different design and performance characteristics that should be considered when choosing the product.
